No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1988 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 262

NUMBER 1, APRIL 1988

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Comparison of 3-Hydroxybutyrate Dehydrogenase from Bovine Heart and Rat Liver Mitochondria
J. Oliver McIntyre, Norbert Latruffe, Stephen C. Brenner, and Sidney Fleischer 85

Degradation Mechanisms of Phenolic β-1 Lignin Substructure Model Compounds by Laccase of *Coriolus versicolor*
Shingo Kawai, Toshiaki Umezawa, and Takayoshi Higuchi 99

Co-oxidation of Salicylate and Cholesterol during the Oxidation of Metmyoglobin by H_2O_2 *Dimitrios Galaris, Diego Mira, Alex Sevanian, Enrique Cadenas, and Paul Hochstein* 221

Hydroxyl Free Radical Mediated Formation of 8-Hydroxyguanine in Isolated DNA *Robert A. Floyd, Melinda S. West, Kenton L. Eneff, William E. Hogsett, and David T. Tingey* 266

Oxygen Tension within the Arterial Wall: Relationship to Altered Bioenergetic Metabolism and Lipid Accumulation
David P. Hajjar, Ira C. Farber, and Samuel C. Smith 375

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Kinetic Analysis of 6-Phosphogluconate Dehydrogenase from Bass Liver: Effects of Temperature and pH on Its Catalytic Function
María del mar Medina-Puerta, Milagrosa Gallego-Iniesta, and Amando Garrido-Pertierra 130

In Situ Behavior of the Pyrimidine Pathway Enzymes in *Saccharomyces cerevisiae*. 3. Catalytic and Regulatory Properties of Carbamylphosphate Synthetase: Channeling of Carbamylphosphate to Aspartate Transcarbamylase
Mohamed Belkaïd, Bernadette Penverne, and Guy Hervé 171

Stability and Substrate Specificity of a β-Glucosidase from the Thermophilic Bacterium Tp8 Cloned into *Escherichi coli* *Adrian R. Plant, Janice E. Oliver, Mark L. Patchett, Roy M. Daniel, and Hugh W. Morgan* 181

Purification and Characterization of Aldehyde Dehydrogenase from Rat Liver Mitochondria *D. J. Senior and C. S. Tsai* 211

The Nature of Enzyme—Substrate Complexes in Acyl-Coenzyme A Dehydrogenases *Sze-Mei Lau and Colin Thorpe* 293

Activation of Human Spleen Glucocerebrosidases by Monoacylglycol Sulfates and Diacylglycerol Sulfates
Mary L. Gonzales, Alakananda Basu, Gerard H. de Haas, Ruud Dijkman, Maarten G. van Oort, Angela A. Okolo, and Robert H. Glew 345

GLYCOPROTEINS AND GLYCOLIPIDS

Glycolipid–Lectin Interactions: Reactivity of Lectins from *Helix pomatia*, *Wisteria floribunda*, and *Dolichos biflorus* with Glycolipids Containing *N*-Acetylgalactosamine *B. Virginia Torres, David K. McCrumb, and David F. Smith* 1

Ganglioside Biosynthesis in Rat Liver: Effect of UDP-Amino Sugars on Individual Transfer Reactions
Renate Schüz-Henninger, Claudia Prinz, and Karl Decker 49

MEMBRANE TRANSPORT AND INTRACELLULAR SIGNALS

Phorbol Esters Induce Two Distinct Changes in GH_3 Pituitary Cell Adenylate Cyclase Activity *Stephen T. Summers and Michael J. Cronin* 12
Leucine Transport System in a Facultatively Alkalophilic *Bacillus*
Kunitoshi Wakabayashi, Noriyuki Koyama, and Yoshiaki Nosoh 19
Proton Pump-Linked Mg^{2+}-ATPase Activity in Isolated Rat Liver Lysosomes
Paolo Dell'Antone 314
Calcium Modulation of Phosphoinositide Kinases in Transverse Tubule Vesicles from Frog Skeletal Muscle
M. Angélica Carrasco, Karin Magendzo, Enrique Jaimovich, and Cecilia Hidalgo 360

MEMBRANES, CELL SURFACES, AND RECEPTORS

Attenuation of Platelet Activating Factor (PAF)-Induced Stimulation of Rabbit Platelet GTPase by Phorbol Ester, Dibutyryl cAMP, and Desensitization: Concomitant Effects on PAF Receptor Binding Characteristics
Hiroshi Homma and Donald J. Hanahan 32
Damaging Effects of *Clostridium perfringens* Delta Toxin on Blood Platelets and Their Relevance to Ganglioside G_{M2}
Colette Jolivet-Reynaud, Jean-Marie Launay, and Joseph E. Alouf 59
Skeletal Muscle Sarcolemma Proteins as Targets for Adenosine 3′:5′-Monophosphate-Dependent and Calcium-Dependent Protein Kinases
S. Ivar Walaas, Robert S. Horn, Angus C. Nairn, Otto Walaas, and Arnfrid Adler 245
Distinction between Glycoprotein IIIa and the 100-kDa Membrane Protein (Aggrogin) Mediating ADP-Induced Platelet Activation
Robert W. Colman, William R. Figures, Qi-Xia Wu, Si-Yin Chung, Thomas A. Morinelli, George P. Tuszynski, Roberta F. Colman, and Stefan Niewiarowski 298

MOLECULAR BIOLOGY, GENE EXPRESSION, AND DEVELOPMENTAL BIOCHEMISTRY

Involvement of Protein Kinase C in the Transcriptional Regulation of Ornithine Decarboxylase Gene Expression by 12-*O*-Tetradecanoylphorbol-13-acetate in T24 Human Bladder Carcinoma Cells *J. T. Hsieh and Ajit K. Verma* 326

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Mechanism of Reductive Activation of a 5-Nitroimidazole by Flavoproteins: Model Studies with Dithionite
Gregory L. Kedderis, Lois S. Argenbright, and Gerald T. Miwa 40
Inducers of Cytochrome *P*-450d: Influence on Microsomal Catalytic Activities and Differential Regulation by Enzyme Stabilization
Richard Voorman and Steven D. Aust 76
Characterization of Antibodies to a Rabbit Hepatic UDP-Glucuronosyltransferase and the Identification of an Immunologically Similar Enzyme in Human Liver
Mitchell D. Green, Birgit L. Coffman, Yacoub M. Irshaid, and Thomas R. Tephly 367

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

Purification and Characterization of a Low Molecular Weight Basic Protein from Marine Turtle Egg White *Syamal Chakrabarti, P. C. Sen, and N. K. Sinha* 286

6-Nitro-L-tryptophan: A Novel Spectroscopic Probe of *trp* Aporepressor and Human Serum Albumin *Robert S. Phillips and Ronen Q. Marmorstein* 337

PROTEIN STRUCTURE AND FUNCTION

Sarcomere Matrix of Striated Muscle: *In Vivo* Phosphorylation of Titin and Nebulin in Mouse Diaphragm Muscle *Laura L. Somerville and Kuan Wang* 118

Effects of Anions, Ca^{2+}, Mg^{2+}, and Aliphatic Alcohols on the Reaction of Hemocyanin with Cyanide *Mariano Beltramini, Meri Santamaria, and Benedetto Salvato* 149

Purification and Identification of Two Serine Class Proteinases from Dog Mast Cells Biochemically and Immunologically Similar to Human Proteinases Tryptase and Chymase *Norman M. Schechter, Dorothy Slavin, Richard D. Fetter, Gerald S. Lazarus, and Jorma E. Fräki* 232

Purification of *Vibrio fischeri* Nitrite Reductase and Its Characterization as a Hexaheme *c*-Type Cytochrome *Ming-Cheh Liu, Barbara W. Bakel, Ming-Yih Liu, and Trung N. Dao* 259

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

Purification and Characterization of Human Myometrial Smooth Muscle Collagenase *William T. Roswit, Leonard Rifas, Michael J. Gast, Howard G. Welgus, and John J. Jeffrey* 67

In Vivo Catabolism of Heparin Cofactor II and Its Complex with Thrombin: Evidence for a Common Receptor-Mediated Clearance Pathway for Three Serine Proteinase Inhibitors *Charlotte W. Pratt, Frank C. Church, and Salvatore V. Pizzo* 111

Characterization of the Fibrin Polymer Structure That Accelerates Thrombin Cleavage of Plasma Factor XIII *Charles S. Greenberg, Komandoor E. Achyuthan, Shrin Rajagopalan, and Salvatore V. Pizzo* 142

Biosynthesis of Lysosomal Cathepsins B and H in Cultured Rat Hepatocytes *Yukio Nishimura, Jun Amano, Hiroshi Sato, Hiroshi Tsuji, and Keitaro Kato* 159

Proteolysis of the Protein Inhibitor of Calcium-Dependent Proteases Produces Lower Molecular Weight Fragments That Retain Inhibitory Activity *George N. DeMartino, Ruth Wachendorfer, Michael J. McGuire, and Dorothy E. Croall* 189

ATP-Stimulated Proteolysis in Soluble Extracts of BHK 21/C13 Cells. Evidence for Multiple Pathways and a Role for an Enzyme Related to the High-Molecular-Weight Protease, Macropain *Michael J. McGuire, Dorothy E. Croall, and George N. DeMartino* 273

REGULATION OF METABOLISM AND OF ENZYME ACTION

In Vitro Phosphorylation of Fructose-1,6-bisphosphatase from Rabbit and Pig Liver with Cyclic AMP-Dependent Protein Kinase *Kristina Nilsson Ekdahl* 27

Kinetic Analysis of the Interactions between Plasminogen Activator Inhibitor 1 and Both Urokinase and Tissue Plasminogen Activator
Carla M. Hekman and David J. Loskutoff 199
Insulin-Stimulated Microtubule Associated Protein Kinase Is Detectable by Analytical Gel Chromatography as a 35-kDa Protein in Myocytes, Adipocytes, and Hepatocytes *L. Bryan Ray and Thomas W. Sturgill* 307
Sigmoid Kinetics of Human Erythrocyte Glucose-6-phosphate Dehydrogenase
S. A. Adediran 354

NUMBER 2, MAY 1, 1988

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Methylene Blue Competes with Paraquat for Reduction by Flavo-enzymes Resulting in Decreased Superoxide Production in the Presence of Heme Proteins
Michael J. Kelner, Richard Bagnell, Braden Hale, and Nicholas M. Alexander 422

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Synthesis of Vitamin K_1 2,3-Epoxide in Rat Liver Mitochondria
Patrick T. Inyangetor and Myrtle Thierry-Palmer 389
Purification and Properties of *S*-Adenosyl-L-methionine:Nicotinic Acid-*N*-methyltransferase from Cell Suspension Cultures of *Glycine max* L.
Barbara Upmeier, Wildtrud Gross, Susanne Köster, and Wolfgang Barz 445

GLYCOPROTEINS AND GLYCOLIPIDS

Binding and Precipitation of Lectins from *Erythrina indica* and *Ricinus communis* (Agglutinin I) with Synthetic Cluster Glycosides
Lokesh Bhattacharyya and C. Fred Brewer 605
Monoclonal Antibodies That Bind to Galactosylgloboside (SSEA-3 Antigen)
Donald M. Marcus, Stephanie Gilbert, Michiko Sekine, and Akemi Suzuki 620

LIPIDS AND PROSTAGLANDINS

Triacylglycerol Synthesis in Developing Seeds of Groundnut (*Arachis hypogaea*): Pathway and Properties of Enzymes of *sn*-Glycerol 3-Phosphate Formation
Shobha Ghosh and P. S. Sastry 508

MEMBRANE TRANSPORT AND INTRACELLULAR SIGNALS

Calmodulin-Stimulated Cyclic Nucleotide Phosphodiesterases in Plasma Membranes of Bovine Epididymal Spermatozoa
Prem S. Chaudhry and Edmund R. Casillas 439
Control of Leucine Transport in Yeast by Periplasmic Binding Proteins
Silvia R. Wainer, Alberto Boveris, and Eugenia H. Ramos 481
Isolation and Partial Characterization of an Ion Channel Protein from Human Sperm Membranes *George Pei Herng Young, Samuel S. Koide, Marc Goldstein, and John Ding-E Young* 491

MEMBRANES, CELL SURFACES, AND RECEPTORS

Guanine Nucleotide Regulation of the Interconversion of the Two-State Hepatic Glucagon Receptor System of Rat *Russell J. Wyborski, Edwin M. Horwitz, W. Terry Jenkins, Jeffrey S. Mormol, and Ruth S. Gurd* 532

Ethanol-Induced Modifications to Membrane Lipid Structure: Effect on Phospholipase A_2–Membrane Interactions *Christopher D. Stubbs, Brian Wesley Williams, Celeste L. Pryor, and Emanuel Rubin* 560

Sublytic and Lytic Effects of the Zwitterionic Bile Derivative 3-((3-Deoxycholamidopropyl)dimethylammonio)-1-propanesulfonate on Phosphatidylcholine Liposomes
M. A. Partearroyo, F. J. Aranda, A. Alonso, J. C. Gómez-Fernández, and F. M. Goñi 585

MOLECULAR BIOLOGY, GENE EXPRESSION, AND DEVELOPMENTAL BIOCHEMISTRY

Comparison of Rat and Mouse Ornithine Aminotransferase with Respect to Molecular Properties and Regulation of Synthesis
James M. Burcham, Carol S. Giometti, Sandra L. Tollaksen, and Carl Peraino 501

Transcriptional Regulation of Myeloperoxidase Gene Expression in Myeloid Leukemia HL-60 Cells during Differentiation into Granulocytes and Macrophages *Tetsuya Sagoh and Michiyuki Yamada* 599

A Rare Genetically Determined Electrophoretic Variant of Human Leucocyte Type III Hexokinase *Howard M. Katzen and Denis D. Soderman* 626

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Complexation of Cytochrome *P*-450 Isozymes in Hepatic Microsomes from SKF 525-A-Induced Rats *Michael Murray* 381

Oxidative Stress Limits Vitamin D Metabolism by Bovine Proximal Tubule Cells *in Vitro* *Joseph F. Crivello* 471

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

Electrophoretic and Spectroscopic Analyses of Equine α_2-Macroglobulin with Cleavage of the Thiol Ester Bonds by Methylamine
Aiichiro Motoshima, Misaki Sera, Takayuki Funakoshi, Shozo Shoji, Yukiho Kubota, and Hiroshi Ueki 517

Circular Dichroism of Bilirubin–Amine Association Complexes: Insights into Bilirubin–Albumin Binding *David A. Lightner, Jing-Yi An, and Yu-Ming Pu* 543

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

Partial Purification, Characterization, and Kinetic Analysis of Isoflavone 5-*O*-Methyltransferase from Yellow Lupin Roots
Henry E. Khouri, Satoshi Tahara, and Ragai K. Ibrahim 592

PROTEIN STRUCTURE AND FUNCTION

Renal γ-Glutamyl Transpeptidases: Structural and Immunological Studies
Suresh S. Tate, Vijay Khadse, and Daniel Wellner 397

Glycyl-tRNA Synthetase of *Escherichia coli:* Immunological Homology with Phenylalanyl-tRNA Synthetase
Glenn M. Nagel, Mark S. Johnson, James Rynd, Ezio Petrella, and Bruce H. Weber 409

Evidence of Acid Phosphatase in the Cytoplasm as a Distinct Entity
Chung-Ho Chen and Sumi C. Chen 427
Proteolysis as a Probe of Ligand-Associated Conformational Changes in Rat Carbamyl Phosphate Synthetase I *Margaret Marshall and Leonard A. Fahien* 455
Reconstitution of Human Factor VIII from Isolated Subunits *Philip J. Fay* 525
The Disulfide Content of Calf γ-Crystallin *Martin J. McDermott, Mary Ann Gawinowicz-Kolks, Raúl Chiesa, and Abraham Spector* 609

REGULATION OF METABOLISM AND OF ENZYME ACTION

Synergism of Phosphorylation of 46K Protein(s) and Arachidonate Release in the Induction of Superoxide Anion Production in Guinea Pig Polymorphonuclear Leukocytes
Toshiaki Ohtsuka, Masaki Ozawa, Teruaki Katayama, and Sadahiko Ishibashi 416
Purification and Properties of a Protamine Kinase and a Type II Casein Kinase from Bovine Kidney Mitochondria *Zahi Damuni and Lester J. Reed* 574

AUTHOR INDEX FOR VOLUME 262 636

The Subject Index for Volume 262 will appear in the December 1988 issue as part of a cumulative index for the year 1988.

Instructions to Authors[1]

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. Gene sequences should be simultaneously submitted to a gene databank. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

---

[1] An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics.* Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $^{3}/_{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. Susi, H., and Byler, D. M. (1987) *Arch. Biochem. Biophys.* **258,** 465–469.
2. Bovey, F. A., and Jelinsky, L. W. (1983) Chain Structure and Conformation of Macromolecules, p. 150, Academic Press, New York.
3. Britton, G. (1985) *in* Methods in Enzymology (Law, J. H., and Rilling, H. C., Eds.), Vol. 111, pp. 113–149, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
